Compliance File

Dear Mr. Smyser:

As part of the settlement entered in the January 9, 1989, Consent Agreement and Final Order (CAFO), your facility was required to submit a written demonstration pursuant to 35 Ill. Adm. Code 725.190(e) to both the United States Environmental Protection Agency (U.S. EPA) and the Illinois Environmental Protection Agency (IEPA) for review and approval.

The U.S. EPA received a copy of your written demonstration on February 4, 1989, completed its review, and determined that the demonstration was acceptable. However, since IEPA, the authorized agency, has not completed its review, a final determination was not made on the demonstration. The review by IEPA was prolonged due to the fact that the written demonstration was reviewed in conjunction with the review of your facility's closure certification. Based on the October 1, 1990, letter from IEPA to PVS Chemicals, Inc. (PVS), in which PVS was released from its financial assurance requirements pursuant to 35 Ill. Adm. Code 725.243(h) and U.S. EPA's review, your waiver demonstration of February 4, 1989, pursuant to 35 Ill. Adm. Code 725.190(e) has been approved. In no way will this approval affect any other conditions set forth in the CAFO. Your facility shall continue to maintain compliance with the pertinent standards applicable to generators of hazardous waste identified at 35 Ill. Adm. Code Para. 722.

If you have any questions regarding this matter, please contact Jonathan Adenuga at (312) 886-7954.

Sincerely yours,

Wm. E. Muno
